

Newsletter - December 2023

Greetings and warmest welcome to the December 2023 edition of the WindSim newsletter!

First and foremost, we are grateful for our collaboration in 2023 and would like to wish you a safe, happy, and healthy 2024!

In this newsletter edition, we're excited to share updates on recent developments, upcoming product launches, and events planned for 2024. Our game-changing cloud-based platform, WindSim Accelerator, has had three releases in 2023 with more to come in 2024. We're continuously implementing new functionality to make enhancements accessible to as many users as possible.

We're also discussing remote sensing correction, and have released our training & event schedule for 2024. We hope you find this newsletter engaging and hope to meet you in 2024! In the meantime, we hope you enjoy the end of the year, spend precious time with family and friends, and enjoy a well-deserved time of rest.

Warm regards,
The WindSim Team

WindSim Accelerator

WindSim Accelerator, our flagship product, is now 1,5 years old and has seen 5 releases so far, with more to come. Accuracy, speed and user-friendliness are at the core and an exciting roadmap lies ahead. [Read more...](#)
